

Corporate Group Weiss

A strong partner

weiss

Together to Success with a reliable partner

The Weiss Group, headquartered in central hessian Haiger, is one of the leading manufacturers of modern adhesive systems, sandwich and façade elements as well as cleaning agents in Europe and also sells its products in non-European countries, including China, Russia and the USA.

Since its foundation in 1815, the traditional company has developed from a small skin-glue producer to an internationally active industrial enterprise with 325 employees and four locations. By bundling the core competencies from three areas under one roof, the Weiss group of companies offers its customers technically high-quality and economical solutions from one single source.

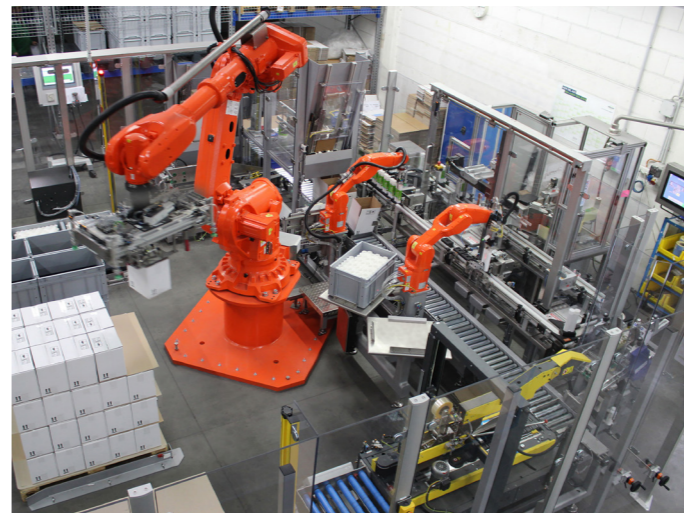

With a focus on quality, Weiss has been a reliable partner for the building materials industry, automotive and shipbuilding for decades.

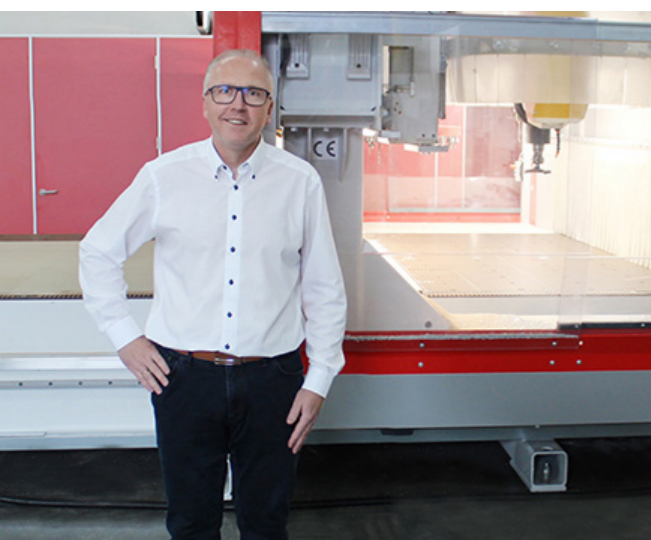

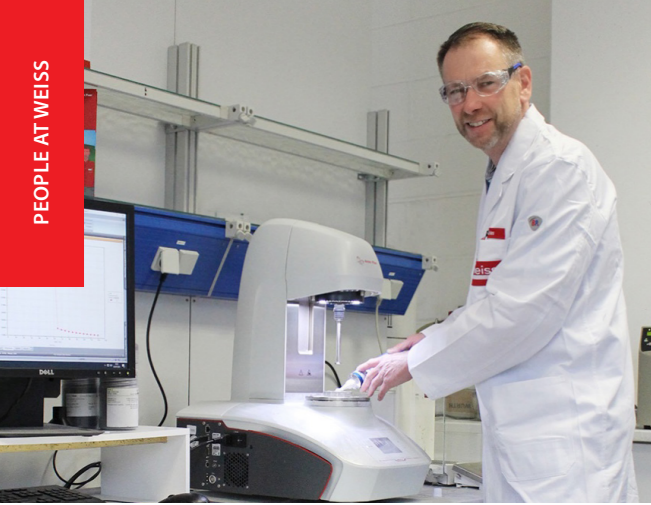

Our Mission

We are producing technically high-grade and efficient solutions

With our problem solutions, we want to offer clear benefit advantages based on high technical requirements, efficiency and availability to our customers. We are going to work in a customer- and market-oriented way and develop the products and services for tomorrow – Therefore, we seek the close and personal dialogue and remain close to the market. In doing so, quality, fast and reliable delivery service, readiness and ability to innovate, flexibility, as well as sustainability, provide the basic values of our company culture.

By means of modern production systems and the supporting automation in the form of robots in our production in combination with our motivated employees, we are able to cover all of our customers' demands or technical needs by a complete, "well rounded" product range. The whole product portfolio is "made in Germany" and is produced at three German production locations.

Our Employees in the thick of the action

We motivate and demand our employees by delegation of responsibility, clear areas of competence and comprehensive information. Within the frame of working relationships for the longest time possible with performance-based remuneration, possibilities for advanced training and development we are promoting personal responsibility, self-fulfilment and the identification with the company.

We expect our employees to assume and to take seriously the delegated responsibility, as well as to be willing to perform and learn and ready to innovate. Together we want to establish a climate in which all employees feel well and can jointly experience their success. This requires the willingness to communicate, tolerance and loyalty.

Factory I in Haiger

Manufacture and sales of adhesives, special cleaners and composite panels

Location

Hansastr. 2
35708 Haiger
Germany
Phone: +49 (0) 2773 / 815 - 0
E-mail: ks@weiss-chemie.de

The Company History

Milestones of our company history

Since the company's foundation in 1815, Weiss has grown from a small hide-glue producer to an internationally acting, industrial company for modern adhesive systems and composite panels. With a passion for quality and the claim on ourselves to meet our customers' high expectations, we have become a reliable partner on the market.

1815

Philipp Carl Weiss founds the glue factory in Haiger

1830

First coat of arms of Philipp Carl Weiss Glue Factories

1857

Business takeover by the son Philipp Carl Wilhelm Weiss

1868

Proper accounting in a cash book

1890

A specially built walk mill serves as a residential and factory building

1907

Workers and servants of the constantly growing company

1920

Factory premises "Am unteren Mühlenweiher" in Haiger

1955

Sales promotion with a contemporary booth

1960

Locomotive of the Bundesbahn serves as replacement boiler after a boiler failure

1965

Skin glue extraction

1965

Boiler house

1970

Look into the laboratory

1983

The product range is extended by the composite panels

1989

A big fire destroys the new production building and the warehouse

1993

Acquisition of Pudol, a manufacturer of cleaning and care products

2001

Acquisition of Mallok, a manufacturer of façade elements & film lamination technology

2008

Comprehensive expansion of the existing office building complex

2010

New building of a logistics centre with a surface capacity of 3,700 m²

2013

Construction of a new warehouse with 1,100 pallet holding areas

2014

New fully automatic re-stacking gantry for composite panels

2015

Equipping of diverse production areas with robot technology

2017

Certification of bio-based adhesives

2020

Commissioning of a photovoltaic system

2021

Further robots start their work

COSMO® ADHESIVES

DURABLY FIRM JOINTS

Traditional joining technologies like riveting, soldering, welding, or screwing, will increasingly be replaced by modern adhesive systems, resulting in many advantages. Our product range includes more than **400 variants** of surface and construction adhesives and superglues, as well as special adhesives for a wide variety of applications.

Adhesive systems

Cyanoacrylates
PUR adhesives
Diffusion adhesives
Hybrid adhesives
EPOXY adhesives
Dispersion adhesives
PRIMERS
Cleaners
Bio-based

Fields of application

Window / door construction
Airtight bonding
Transportation / Marine engineering
Building industry / Dry construction
Industrial applications
Assembly works
Sandwich board manufacture
Container construction
Wood / furniture industry

COSMO® COMPOSITE PANELS

UNLIMITED POSSIBILITIES FOR DESIGN

Composite panels made by Weiss leave nothing to be desired. Because there is a large number of top coats and core materials available as well as the possibility of combining and processing them in many different ways, more than **5,000 variants** result for the finished element.

Composite panels

- Heat-insulating
- Burglar/penetration-resistive
- Noise insulating
- Grooved
- Customised
- Frame widening

Fields of application

- Façade building
- Window construction
- Door / gate / partition construction
- Shipbuilding
- Vehicle / trailer body
- Machine/plant construction
- Container construction

COSMO® FAÇADE ELEMENTS

FASCINATION IN GLASS AND METAL

With all its structural and economic advantages, the façade element is the preferred building component for commercial and functional buildings. Our façade elements have proved to be successful for many years with their excellent heat and noise insulating characteristics in famous buildings of European architecture.
