

NEW DMPT-free CA-Accelerator COSMO® SP-860.160

Give the go-ahead for fast and safe bonding

The new **CA-Accelerator COSMO® SP-860.160** convinces of high performance and substitutes the former **COSMO® SP-860.120**.

FOCUS ON HEALTH

- + No health risks conditional on DMPT
- + No GHS-hazard symbols for acute toxicity

FULL PERFORMANCE

- + Fast hardening of **COSMO® CA-Instant Adhesive**
- + Shorter process times
- + Ideal for porous or smooth materials
- + Optimal for highly viscous instant adhesive like **COSMO® CA-500.130**

150 ml spray can

DEMO VIDEO

SPECIAL PROPERTIES

Controlled accelerated hardening of highly-viscous **COSMO® CA-Instant Adhesives**

EXAMPLES FOR APPLICATION

- + Assembly work where adhesive bonds must be immediately load-bearing
- + Bonding processes in series production where time savings are crucial
- + Bonding of porous materials such as wood or foam, which would otherwise absorb the adhesive too quickly

TECHNICAL DATA

Basis:	Aminic activator in solvent
Density as per EN 542 at +20 °C:	approx. 0.80 g/cm ³
Processing temperatures:	from +5 °C to +30 °C
