UNIVERSAL PROFILE CLEANER

Detergent, surface-active cleaner for cleaning of all profile surfaces made of wood, plastic and aluminium windows, doors, and façades. Streak-free cleaning of glass and high gloss surfaces.

For all paints

Wood surfaces must be varnished or thick glazed.

SPECIAL CARE PEN

For care and preservation of sealings. It keeps the ductility, and in summer, it prevents the sealing from sticking on, while in winter, it prevents it from freezing on the profile.

SPECIAL PROFILE CLEANER

Abrasive intensive cleaner for cleaning of profile surfaces of PVC white and aluminium-anodised surfaces of windows, doors and shutters.

Only for PVC white & aluminium-anodised
Not for paints

FITTING OIL

For care and maintenance of fitting and hinges. It preserves the necessary sliding characteristics of the moveable parts, and in this way, it avoids dry rubbing connected with running/eating into the metals and furthermore, it provides additional corrosion protection.

NATURE PROFILE CLEANER

Active surfactant cleaner for cleaning and care of varnished and thick-glazed wooden windows and front doors, as well as wooden roller and folding shutters.

For wood

PROFI MICROFIBRE CLOTH

Special cleaning cloth with high number of meshes for professional cleaning of all profile surfaces in combination with all our profile cleaners.
