GB Page 2 of 4 8.2.2 Individual protection measures, such as personal protective equipment Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 01.11.2021 / 0009 Replacing version dated / version: 24.07.2018 / 0008 Vaild from: 01.11.2021 PDF print date: 01.11.2021 General hygiene measures for the handling of chemicals are applicable. Wash hands before breaks and at end of work. Keep away from food, drink and animal feedingstuffs. Remove contaminated clothing and protective equipment before entering areas in which food is consumed. COSMO CL-300.150 Eve/face protection: Tight fitting protective goggles with side protection (EN 166). (COSMOFEN 60) Skin protection - Hand protection: Solvent resistant protective gloves (EN ISO 374). 6.3 Methods and material for containment and cleaning up Soak up with absorbent material (e.g. universal binding agent, sand, diatomaceous earth) and dispose of according to Section 13. Recommended Protective nitrile gloves (EN ISO 374). Protective viton® / fluoroelastomer gloves (EN ISO 374). Minimum layer thickness in mm: >= 0.50 Permeation time (penetration time) in minutes: 6.4 Reference to other sections For personal protective equipment see Section 8 and for disposal instructions see Section 13. **SECTION 7: Handling and storage** The beaching in these determined in accordance with EN 105251 were conditions. The recommended maximum wearing time is 50% of breakthrough time. Protective hand cream recommended. In addition to information given in this section, relevant information can also be found in section 8 and 6.1. 7.1 Precautions for safe handling 7.1.1 General recommendations Avoid inhalation of the vapours Skin protection - Other: Ensure good ventilation. Solvent resistant protection clothing (EN 13034) I applicable, suction measures at the workstation or on the processing machine necessary. Keep away from sources of ignition - Do not smoke. Take measures against electrostatic charging, if appropriate. Respiratory protection: If OES or MEL is exceeded. Avoid contact with eves or skin. Gas mask filter A (EN 14387), code colour brown Handle and open container with care Observe wearing time limitations for respiratory protection equipment. Eating, driving, smoking, as well as food-storage, is prohibited in work-room. Observe directions on label and instructions for use. Use working methods according to operating instructions. Thermal hazards Not applicable 7.1.2 Notes on general hygiene measures at the workplace General hygiene measures for the handling of chemicals are applicable. Wash hands before breaks and at end of work. Additional information on hand protection - No tests have been performed. Keep away from food, drink and animal feedingstuffs ove contaminated clothing and protective equipment before entering areas in which food is consumed. 7.2 Conditions for safe storage, including any incompatibilities Keep out of access to unauthorised individuals. Not to be stored in gangways or stair wells. Store product closed and only in original packing. Observe special storage conditions. Do not store with flammable or self-igniting materials. before use Solvent resistant floor Protect from direct sunlight and warming and must be observed Store cool. Store in a dry place 8.2.3 Environmental exposure controls No information available at present 7.3 Specific end use(s) Cleaning product **SECTION 9: Physical and chemical properties** SECTION 8: Exposure controls/personal protection 9.1 Information on basic physical and chemical properties 8.1 Control parameters Physical stat Colour: Liquid Colourless Workplace exposure limit (WEL) of the total hydrocarbon solvent content of the mixture (RCP method according to EH40): 1000 mg/m3 Odour: Melting point/freezing point: Boiling point or initial boiling point and boiling range: 78 - 113 °C

 WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany).
 (8) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (12) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (11) = Inhalable fraction (Directive 2004/37/CE). (12) = Inhalable fraction, are spirable fraction in those Member States that implement, on the date of the entry into force of this Directive, a biomonitoring system with a biological limit value not exceeding 0.002 mg Cd/g creatinine in urine (Period) and (Part 1000) (Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute

(Directive 2004/37/CE). | WEL-STEL = vvulnprace Lapoce Laborato Laborato 2004/37/CE). | WEL-STEL = vvulnprace Lapoce Laborato 2004/37/CE). | WEL-STEL = vvulnprace Lapoce Laborato 2004/37/CE). | WEL-STEL = vvulnprace Lapoce Laborato 2004/37/CE). | (8) = Inhalable fraction (2017/164/EU, 2017/2398/EU). (10) = Short-term exposure limit value in relation to a reference period of 1 minute (2017/164/EU). | BMGV = Biological monitoring guidance value EH40. BGW = 'Biologischer Grenzwert' (biological limit value, Germany) | Other information: Sen = Capable of causing occupational astma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage. \*\* = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the cost of revision The exposule initial to this substance is repeated infougn the TRGS 900 (certificity) of January 2000 with the goal of revision.
 (13) = The substance can cause sensitisation of the skin and of the respiratory tract (Directive 2004/37/CE),
 (14) = The substance can cause sensitisation of the skin (Directive 2004/37/CE).

### 8.2 Exposure controls

## 8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction. If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection

should be worn. Applies only if maximum permissible exposure values are listed here

Applies only if maximum permissiole exposure values are listed nere. Suitable assessment methods for reviewing the effectiveness of protection measures adopted include metrological and non-metrological investigative techniques. These are specified by e.g. EN 14042. EN 14042 "Workplace atmospheres. Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents".

>= 480 The breakthrough times determined in accordance with EN 16523-1 were not obtained under practical In the case of mixtures, the selection has been made according to the knowledge available and the information about the contents. Selection of materials derived from glove manufacturer's indications. Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account. Selection of a suitable glove depends not only on the material but also on other quality characteristics and varies from manufacturer to manufacturer. In the case of mixtures, the resistance of glove materials cannot be predicted and must therefore be tested

The exact breakthrough time of the glove material can be requested from the protective glove manufacturer

Characteristic There is no information available on this parameter. Flammability: Flammable Lower explosion limit: Upper explosion limit: Flash point: Auto-ignition temperature: 0,8 Vol-% 7,7 Vol-% -14 °C n.a. There is no information available on this parameter. Decomposition temperature: pH: Mixture is non-soluble (in water) Kinematic viscosity: <7 mm2/s (40°C) Insoluble Does not apply to mixtures. 61 hPa (20°C) Solubility: Partition coefficient n-octanol/water (log value): Vapour pressure: Density and/or relative density: ~0,71 g/cm3 (20°C) There is no information available on this parameter. Does not apply to liquids. Relative vapour density: Particle characteristics: 9.2 Other information Explosive Product is not explosive. When using: development of explosive vapour/air mixture possible. of e No Oxidising liquids: Bulk density n.a Solvents content: >99 % (Organic solvents ) **SECTION 10: Stability and reactivity** 

10.1 Reactivity duct has not been tested. **10.2 Chemical stability** Stable with proper storage and handling. 10.3 Possibility of hazardous reactions No dangerous reactions are kr 10.4 Conditions to avoid See also section 7. Heating, open flame, ignition sources Electrostatic charge 10.5 Incompatible materials Avoid contact with strong oxidizing agents. 10.6 Hazardous decomposition products See also section 5.2 No decomposition when used as directed. **SECTION 11: Toxicological information** 

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008 Possibly more information on health effects, see Section 2.1 (classificatio COSMO CL-300.150

(COSMOFEN 60) Toxicity / effect Endpo Value Unit Organis Test method Notes int m Acute toxicity, by oral n.d.a route: Acute toxicity, by n.d.a dermal route: Acute toxicity, by n.d.a. inhalation:

## **SECTION 13: Disposal considerations**

### 13.1 Waste treatment methods

For the substance / mixture / residual amounts

EC disposal code no.: The waste codes are recommendations based on the scheduled use of this product.

Owing to the user's specific conditions for use and disposal, other waste codes may be allocated under certain circumstances. (2014/955/EU) 07 01 04 other organic solvents, washing liquids and mother liquors 14 06 03 other solvents and solvent mixtures

Recommendation: Sewage disposal shall be discouraged. Pay attention to local and national official regulations. E.g. suitable incineration plant.

E.g. suitable incineration plant. **For contaminated packing material** Pay attention to local and national official regulations. Empty container completely. Uncontaminated packaging can be recycled. Dispose of packaging that cannot be cleaned in the same manner as the substance. Do not perforate, cut up or weld uncleaned container. Residues may present a risk of explosion. 15 01 01 paper and cardboard packaging 15 01 04 metallic packaging

### **SECTION 14: Transport information**

### General statements 14.1. UN number or ID number: 3295 Transport by road/by rail (ADR/RID) 14.2. UN proper shipping name: UN 3295 HYDROCARBONS, LIQUID, N.O.S. (SPECIAL PROVISION 640D) UN 3295 HYDROCARBONS, LI 14.3. Transport hazard class(es): 14.4. Packing group: Classification code: LQ: 14.5. Environmental hazards: 3 || F1 1 L · \_ environmentally hazardous D/E Tunnel restriction code Transport by sea (IMDG-code) 142. UN proper shipping name: HYDROCARBONS, LIQUID, N.O.S. (HYDROCARBONS, C6-C7) 14.3. Transport hazard class(es): 3 14.4. Packing group: II EmS: F-E, S-D .. F-E, S-D Marine Pollutant: Yes environmentally hazardous 14.5. Environmental hazards: Transport by air (IATA) 14.2. UN proper shipping name: Hydrocarbons, liquid, n.o.s. 14.3. Transport hazard class(es): 14.4. Packing group: 14.5. Environmental hazards: 3 11 Not applicable 14.6. Special precautions for user Persons employed in transporting dangerous goods must be trained. All persons involved in transporting must observe safety regulations. Precautions must be taken to prevent damage. 14.7. Maritime transport in bulk according to IMO instruments

Freighted as packaged goods rather than in bulk, therefore not applicable Minimum amount regulations have not been taken into account. Danger code and packing code on request. Comply with special provisions.

# **SECTION 15: Regulatory information**

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Observe restrictions: Comply with national regulations/laws governing the protection of young people at work (national implementation of the Directive 94/33/EC)! Regulation (EC) No 1907/2006, Annex XVII Hydrocarbons, C6-C7, n-alkanes, isoalkanes, cyclics, <5% n-hexane Complete the completion of the second secon

Comply with trade association/occupational health regulation

Directive 2012/18/EU ("Seveso III"), Annex I, Part 1 - The following categories apply to this product (others may also need to be considered according to storage, handling etc.):
