 WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany).
 (8) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (11) = Inhalable fraction (Directive 2004/37/CE). (12) = Inhalable fraction. Respirable fraction in those Member States that implement, on the date of the entry into force of this Directive, a biomonitoring system with a biological limit value not exceeding 0,002 mg Cd/g creatinine in urine (Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute

 (8) = Inhalable fraction (2017/164/EU, 2017/2398/EU). (9) = Respirable fraction (2017/164/EU, (b) = Inhalable fraction (2017) over C0, 2017/2390/CD), (b) = Respirative inaction (2017) over C0, 2017/2398/CD), (b) = Short-term exposure limit value in relation to a reference period of 1 minute (2017)/164/CU), [b] MGV = Biological monitoring guidance value EH40, BGW = "Biologischer Grenzwert" (biological limit value, Germany) | Other information: Sen = Capable of causing occupational asthma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage.
\*\* = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the code of travision. the goal of revision.

(13) = The substance can cause sensitisation of the skin and of the respiratory tract (Directive 2004/37/CE), (14) = The substance can cause sensitisation of the skin (Directive 2004/37/CE).

#### 8.2 Exposure controls

## 8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction. If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn.

Applies only if maximum permissible exposure values are listed here. Suitable assessment methods for reviewing the effectiveness of protection measures adopted include metrological and non-metrological investigative techniques. These are specified by e.g. EN 14042. EN 14042 "Workplace atmospheres. Guide for the application and use of procedures for the assessment of

exposure to chemical and biological agents

## 8.2.2 Individual protection measures, such as personal protective equipment General hygiene measures for the handling of chemicals are applicable Wash hands before breaks and at end of work. Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

Eye/face protection: Tight fitting protective goggles with side protection (EN 166).

Skin protection - Hand protection: Solvent resistant protective gloves (EN ISO 374). Recommended Protective gloves in butyl rubber (EN ISO 374). Minimum layer thickness in mm:

>= 0,50 Permeation time (penetration time) in minutes:

= 60

>> ou The breakthrough times determined in accordance with EN 16523-1 were not obtained under practical conditions. The recommended maximum wearing time is 50% of breakthrough time.

Protective hand cream recommended

Skin protection - Other: Solvent resistant protection clothing (EN 13034)

Respiratory protection: If OES or MEL is exceeded.

Gas mask filter A (EN 14387), code colour brown Observe wearing time limitations for respiratory protection equipment.

Thermal hazards:

#### Not applicable

Additional information on hand protection - No tests have been performed. In the case of mixtures, the selection has been made according to the knowledge available and the information about the contents.

Information about the contents. Selection of materials derived from glove manufacturer's indications. Final selection of glove material must be made taking the breakthrough times, permeation rates and

In the selection of give interior most of most early as second early and second early and the second early and the

before use. The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed

8.2.3 Environmental exposure controls

No information available at pres

### **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and ch	
Physical state:	Liquid
Colour:	White
Odour:	Characteristic Butanone
Melting point/freezing point:	There is no information available on this parameter.
Boiling point or initial boiling point and boiling range:	79 °C
Flammability:	Flammable
Lower explosion limit:	1,8 Vol-%
Upper explosion limit:	11,5 Vol-%
Flash point:	-4 °C
Auto-ignition temperature:	390 °C
Decomposition temperature:	There is no information available on this parameter.
pH:	Mixture is non-soluble (in water).
Kinematic viscosity:	There is no information available on this parameter.
Solubility:	Insoluble
Partition coefficient n-octanol/water (log value):	Does not apply to mixtures.
Vapour pressure:	101 hPa (20°C)
Density and/or relative density:	~0,91 g/cm3 (20°C)
Relative vapour density:	There is no information available on this parameter.
Particle characteristics:	Does not apply to liquids.
9.2 Other information	
Explosives:	Product is not explosive. When using: development
	of explosive vapour/air mixture possible.
Oxidising liquids:	No
Bulk density:	n.a.

## **SECTION 10: Stability and reactivity**

10.1 Reactivity The product has not been tested. **10.2 Chemical stability** Stable with proper storage and handling. 10.3 Possibility of hazardous reactions No dangerous reactions are know 10.4 Conditions to avoid See also section 7. Heating, open flame, ignition sources Electrostatic charge 10.5 Incompatible materials Avoid contact with strong oxidizing agents. Avoid contact with strong alkalis. 10.6 Hazardous decomposition products See also section 5.2 No decomposition when used as directed.

**SECTION 11: Toxicological information** 

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008 Possibly more information on health effects, see Section 2.1 (classification COSMO® SL-660.250

**SECTION 13: Disposal considerations** 

## 13.1 Waste treatment methods For the substance / mixture / residual amounts EC disposal code no.: The waste codes are recommendations based on the scheduled use of this product. Owing to the user's specific conditions for use and disposal, other waste codes may be allocated under certain circumstances. (2014/955/EU) 08 04 09 waste adhesives and sealants containing organic solvents or other hazardous substances Recommendation: Sewage disposal shall be discouraged. Pay attention to local and national official regulations. E.g. suitable incineration plant. Hardened product: E.g. dispose at suitable refuse site. For contaminated packing material Pay attention to local and national official regulations. Empty container completely. Uncontaminated packaging can be recycled.

Dispose of packaging that cannot be retryued. Dispose of packaging that cannot be cleaned in the same manner as the substance. Do not perforate, cut up or weld uncleaned container. Residues may present a risk of explosion. 15 01 10 packaging containing residues of or contaminated by hazardous substances **SECTION 14: Transport information** 

#### General statements

General statements	
Transport by road/by rail (ADR/RID)	
14.1. UN number or ID number:	1133
14.2. UN proper shipping name:	
UN 1133 ADHESIVES	
14.3. Transport hazard class(es):	3
14.4. Packing group:	II
14.5. Environmental hazards:	Not applicable
Tunnel restriction code:	D/E
Classification code:	F1
LQ:	5 L
Transport category:	2
Transport by sea (IMDG-code)	
14.1. UN number or ID number:	1133
14.2. UN proper shipping name:	
UN 1133 ADHESIVES	
14.3. Transport hazard class(es):	3
14.4. Packing group:	II
14.5. Environmental hazards:	Not applicable
Marine Pollutant:	Not applicable
EmS:	F-E, S-D
Transport by air (IATA)	
14.1. UN number or ID number:	1133
14.2. UN proper shipping name:	
UN 1133 Adhesives	
14.3. Transport hazard class(es):	3
14.4. Packing group:	II
14.5. Environmental hazards:	Not applicable
14.6. Special precautions for user	
Persons employed in transporting dangerous goods	
All persons involved in transporting must observe saf	fety regulations.
Precautions must be taken to prevent damage.	
44.7 Mentitime themement in bully second	ling to IMO instruments

#### 14.7. Maritime transport in bulk according to IMO instruments

Freighted as packaged goods rather than in bulk, therefore not applicable Minimum amount regulations have not been taken into account.

Danger code and packing code on request. Comply with special provisions.

## **SECTION 15: Regulatory information**

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Observe restrictions: Comply with national regulations/laws governing the protection of young people at work (national implementation of the Directive 94/33/EC)!

Regulation (C) No 1907/2006, Annex XVII Barlum bis(2-ethylhexanoate) Comply with national regulations/laws governing maternity protection (national implementation of the Directive 92/85/EEC)!

Comply with trade association/occupational health regulations.

Directive 2012/18/EU ("Seveso III"), Annex I, Part 1 - The following categories apply to this product (others may also need to be considered according to storage, handling etc.):

Hazard categories	Notes to Annex I	Qualifying quantity	Qualifying quantity
		(tonnes) of dangerous	(tonnes) of dangerous
		substances as referred	substances as referred
		to in Article 3(10) for	to in Article 3(10) for
		the application of -	the application of -
		Lower-tier requirements	Upper-tier requirements
P5c		5000	50000
The Notes to Annex 1 of Directive 2012/18/EU, in particular those named in the tables here and notes 1-6,			

must be taken into account when assigning categories and qualifying quantities

Directive 2010/75/EU (VOC):

~ 77,2 %

National requirements/regulations on safety and health protection must be applied when using work equipment.

**15.2 Chemical safety assessment** A chemical safety assessment is not provided for mixtures.

## **SECTION 16: Other information**

3, 11, 12, 15

Revised sections:

Employee training in handling dangerous goods is required. These details refer to the product as it is delivered. Employee instruction/training in handling hazardous materials is required.

Classification and processes used to derive the classification of the mixture in accordance with the ordinance (EG) 1272/2008 (CLP):

Classification in accordance with regulation (EC) No. 1272/2008 (CLP)	Evaluation method used
Flam. Liq. 2, H225	Classification based on test data.

# GB Page 7 of 7

Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Safety data sheet according to Regulation (EC) No 19 Revision datet /version: 16.08.2023 / 0011 Replacing version dated / version: 12.01.2023 / 0010 Valid from: 16.08.2023 PDF print fate: 16.08.2023 COSMO® SL-660.250

# (COSMOFEN 335 weiss)

Eye Irrit. 2, H319	Classification according to calculation
	procedure.
STOT SE 3, H336	Classification according to calculation
	procedure.

The following phrases represent the posted Hazard Class and Risk Category Code (GHS/CLP) of the product and the constituents (specified in Section 2 and 3). H360D May damage the unborn child. H225 Highly flammable liquid and vapour. H226 Flammable liquid and vapour.

H351 Suspected of causing cancer by inhalation. H302 Harmful if swallowed. H312 Harmful in contact with skin. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. EUH066 Repeated exposure may cause skin dryness or cracking.

Flam. Liq. — Flammable liquid Eye Irrit. — Eye irritation STOT SE — Specific target organ toxicity - single exposure - narcotic effects Acute Tox. — Acute toxicity - oral Acute Tox. — Acute toxicity - oral Acute Tox. — Acute toxicity - dermal Acute Tox. — Acute toxicity - inhalation Skin Irrit. — Skin irritation Eye Dam. — Serious eye damage STOT SE — Specific target organ toxicity - single exposure - respiratory tract irritation Care. — Carcinoconciru. - Carcinogenicity Skin Sens. — Skin sensitization Repr. - Reproductive toxicity
