

# COSMO® CL-350.110

\*\*\* COSMOKLAR Reinigungsmilch

## Cleaning milk

### Examples for Application

- Cleaning of PVC hard white and aluminium-anodized surfaces, as well as for cleaning other smooth, mainly plastic surfaces
- Production and assembly area of window construction
- Regular care of already assembled window, door and shutter profiles

### Special Properties

- Intensive cleaning effect
- Mild to surfaces
- pH-neutral

### Technical Data

<b>Basis</b>	Tenside water cleaner with finely dispersed abrasive pigments
<b>Density</b> as per EN 542 at +20 °C	approx. 1.36 g/cm <sup>3</sup>
<b>Processing temperatures</b>	from +5 °C to +30 °C

### Instructions for use

Acclimatise the product before the application.

Shake before use!

Always check the surfaces to be cleaned for compatibility!

Apply the cleaning agent directly from the bottle on a lint-free, not dying and slightly damp cloth. Clean the surface while slightly rubbing in the longitudinal direction of the section.

Generally avoid circular rubbing movements during the cleaning process!

If the dirt is persistent, the cleaning process can be repeated.

After cleaning has been completed, the surface is subsequently wiped up with a wet cloth.

As a non-abrasive cleaning agent, the COSMO® CL-360.110 is available.

As a solvent -based technical cleaner, the COSMO® CL-300.140 SPECIAL (non-dissolvent and with antistatic agent) and the COSMO® CL-300.120 (slightly solvent) are available for plastic materials, the COSMO® CL-300.150 is available for metal construction.

### Important instructions

Please find the data sheet referring to ingredients as per 648/2004/EC: Regulation on detergents (Annex VII, section D), in [www.weiss-chemie.de](http://www.weiss-chemie.de).

The data sheet for medical personnel as per 648/2004/EC: Regulation on detergents (Annex VII, section C), is available on request.

Our user instructions, processing guidelines, product- and performance data, and other technical statements are only general directives; they describe only the condition of our products (values, determination of values on the date of completion) and the performances do not represent a warranty in the sense of § 443 BGB. **Because of the wide variety of applications of the individual product and the relevant special conditions (e. g. processing parameters, material characteristics, etc.), it is up to the user to test it itself;** our free expert advice for application provided in speech, writing, and as test is nonbinding.

*Please, also consider the Safety Data Sheet!*

### Storage

Store the hermetically closed original trading units, in a dry place at temperatures of +15 °C to +25 °C no direct sun radiation.

While transported within the usual transport times, the product may be exposed to temperatures from -30 °C to +35 °C.

Storage life in unopened original packaging: 24 Months.
